

Performance Goal 2.2.4 - Reduce the Amount of Government Property

Status

- April Update - On April 6, a E-mail was sent to the District SFAs requesting them to remind the CAOs of the importance of performance goal 2.2.4. Just because they don't have a monthly or quarterly reporting requirement, doesn't mean the goal isn't important. Please suggest to them, if they haven't already done so, to read my article in the January 2000 newsletter on the performance goal. A good way to do this would be during your regular E-mails, conference calls, and visits. Please re-emphasize the importance of diligent utilization and disposition reviews. During the performance of a property control system analysis, the contractor should be reminded of the requirement to report excess in a timely manner.

Performance Goal 2.2.4 - Reduce the Amount of Government Property

Status

- March Update - In the January 2000 Property Management Newsletter we wrote an article explaining what we wanted the CAOs to do to accomplish this goal:
 - Continue to perform diligent utilization reviews.
 - Ensure contractor's property control procedures require the identification and prompt reporting of excess property at both prime and subcontractor locations, and make checks to verify the excess is being promptly reported.
 - Plant Clearance Officers establish close working relationships with contractors.
 - Check to ensure new property is contractually authorized and advise Procuring Contracting Officers when their procurement practices are outside the parameters of the FAR.
 - Accomplish effective close-out reviews-zero balance DD Form 1662 submitted.

2.2.4 - Reduce the Amount of Gov't

Property

- Performance Goal Description: Reduce the amount of Government property (plant equipment, special test equipment, special tooling, and material as defined by FAR Part 45 that is provided in support of contract performance) in the hands of contractors by 5% compared to the FY 99 ending balance (September 30, 1999).
- Target Completion Date: September 30, 2000
- Rating: Whether or not DCMC obtains this Command-wide goal, will be measured by HQ DCMC in December 2000, by comparing the amount of DoD Property in the Custody of Contractors on September 30, 2000 (DD Form 1662 submissions), against the amount of DoD Property in the Custody of Contractors on September 30, 1999, to determine if the 5% reduction goal was accomplished.
